

ESTIMATED GLOBAL CO₂ EMISSIONS FOR 2018

HZZK
HABLA ZIG-ZAG KILNS

The Potential:

Replacing all brick kilns in developing countries to energy efficient Habla Zig Zag Kilns would remove approximately 500 million tonnes of CO₂ from the atmosphere annually.

An opportunity for Australia to become >90% carbon-neutral via technology transfer.

Equates to:

Removal of 142 million cars from the roads annually.

OR

CO₂

Global removal of more than 500 million tonnes of CO₂ annually.

Achievable Result:

Actual reduction of CO₂ emissions, Greenhouse gas (GHG) emissions, most particularly Black Carbon.
